

## Neubau Schulhaus Rotweg

### SHORT DESCRIPTION

In parts four stories high, the project is situated atop a public parking garage.

### THE PROJECT

The longitudinal side of the existing adjoining building was built on. These façade elements were also clad with closed formwork consisting of cover strips.

### SERVICES IN DETAIL

- - New wood façade
  - New wood ceiling panels in parking garage

### CHALLENGES

The slatted wood façade is hung from wooden brackets mounted to the building`s exterior walls. This required special attention be paid to the building envelope`s vapor barrier.
