

## Renergia waste incineration plant

### SHORT DESCRIPTION

Renergia in Perlen (LU) is a modern and environmentally friendly waste incineration plant.

### THE PROJECT

Renergia is responsible for the recycling of Central Switzerland's waste and is also a power plant that supplies Perlen Papier AG with process steam, provides hot water for several district heating lines and produces electricity for thousands of households. Thanks to the latest technology and the use of waste heat by Perlen Papier AG, exemplary energy efficiency can be achieved. The realization of the Renergia project is a joint effort by all waste disposal associations in Central Switzerland and Perlen Papier AG.

### SERVICES IN DETAIL

- Building services engineering HVACKS
- Fire extinguishing technology

### CHALLENGES

- Natural ventilation in the process area
- Interfaces to the process engineering trades
- Tight schedule
- Official requirements (e.g. RDA systems stairwells)

## SUSTAINABILITY

- Waste is used to generate steam for the Perlen paper mill and electricity
- The residual heat is used to operate a district heating network for the surrounding area
- Planning and coordination in 3D

## FURTHER INFORMATION

Use: Social building, operations building and process engineering

Floor area: 8'800<sup>m2</sup>

Image source: thomi studhalter, faszination fotografie

## FACTS

<b>Location</b>	AG Wagmattplatz 1, Renergia Zentralschweiz, Switzerland
<b>Status</b>	completed
<b>Construction volume (value of our services)</b>	7 M CHF
<b>Start of construction</b>	August 2012
<b>Completion</b>	June 2015
<b>Building owner</b>	Renergia Zentralschweiz AG, CH-6035 Perlen
<b>General management</b>	Fiedler Beck Ingenieure AG, D-200095 Hamburg
<b>Architect</b>	Fiedler Beck Ingenieure AG, D-200095 Hamburg

## SERVICES

New constructions
