MAN Forum

SHORT DESCRIPTION

A cooperative partnership for long-term success: new construction of the customer and delivery centre for MAN trucks in the striking corporate architecture.

THE PROJECT

The customer and delivery centre for MAN trucks integrates seamlessly into the striking corporate architecture of the company's premises. This exceptional design is continued inside the forum, with most of its walls at oblique angles to one another. Despite a challenging brief, the project was handed over ready for operation after just twelve months.

This project is one of a number of orders completed for this client. Other projects completed by the Munich branch at the MAN AG headquarters in Munich include the new office building plus a service academy, a centre of excellence for engineering, a second exhibition hall for the MAN Neoplan Forum and a delivery centre for buses.

SERVICES IN DETAIL
