Nägelimoos primary and secondary school

SHORT DESCRIPTION

In future, the pupils of the "Nägi" will be able to learn and play sport in a particularly pleasant indoor atmosphere: In the first construction phase of the new school complex alone, which includes the double gymnasium and the secondary school building, around 2,300 m^3 of timber was used.

THE PROJECT

Implenia Holzbau has successfully acquired the new construction and renovation of the Kloten Nägelimoos school complex. Both the interior of the primary and secondary school building and the sports hall are made of timber. The use of timber is also clearly visible in the façade panels.
