

Power Systems Headquarter

SHORT DESCRIPTION

The headquarters of Bilfinger Power Systems is the first private construction project to be executed on the basis of a life-cycle offer.

THE PROJECT

The complete package, comprising development, financing, planning, construction and operation, offers a comprehensive cost and quality guarantee for the usage phase.

The energy concept ensures that a comfortable indoor climate can be created at any time of year with a minimum of effort. Concrete core temperature control and static heating surfaces, interior ventilation systems with optimum levels of heat recovery and natural air exchange, and district heating with a low-cost primary energy factor are all elements that support energy-efficient operation.
