

Primary school building Martin Haffter

SHORT DESCRIPTION

The Martin Haffter primary school building was constructed using timber elements. The new building is Minergie-certified.

THE PROJECT

Implenia carries out the demolition of the old school building after the move. The replacement of the primary school building was carried out as a wooden element construction. Consisting of wood from Thurgau trees, the building was certified as Minergie-P.

CHALLENGES

- New construction on existing emergency hospital
- Construction activity during ongoing school operation

SUSTAINABILITY

The system wood construction was built exclusively with wood from Thurgau forests. The school building is Minergie-P

certified.
