

Xpand - ProBioGen

SHORT DESCRIPTION

Implenia converts an office property into a laboratory, production and office building in line with pharmaceutical requirements

THE PROJECT

To expand the research and development capacities of ProBioGen AG, which was founded in 1994 and develops biopharmaceutical active ingredients and vaccines, Implenia converted an existing office property into an office, laboratory and production building and added a freight elevator and a striking external steel staircase as an escape and rescue route. In addition to the technical centers in the basement, a prestigious reception area on the first floor, high-quality conference rooms, a staff cafeteria and offices, laboratories including laboratory furniture and clean rooms were built.

SERVICES IN DETAIL

- In addition to the complex building services, systems were installed to produce and supply various qualities of water, including ultrapure water and technical gases N_2 , O_2 and CO_2 .
- A recooling system is located in the inner courtyard.
- The outdoor facilities were redesigned.
- During the construction work, one wing of the building remained in use as an office area.

CHALLENGES

Implementation of comprehensive qualifications for various units to prove that the rooms, supply systems, facilities and

equipment installed by Implenia meet the pharmaceutical requirements.

FACTS

Location	Herbert-Bayer-Straße 8, Berlin , Germany
Status	completed
Construction volume (value of our services)	16.5 M EUR
Start of construction	January 2017
Completion	April 2019
Usage	Labor-, Herstellungs- und Bürogebäude
Building owner	ProBioGen AG, Berlin
