Environment | Policies

Impact on score ●●●●

● → **75**/100

A policy is a set of objectives that addresses specific sustainability issues. It shows a company's intention to reduce impact, mitigate risk or improve performance.

Strengths

Environmental policy on product use
Quantitative objectives set on materials, chemicals & waste
Environmental policy on biodiversity
Environmental policy on energy consumption & GHGs
Quantitative objectives set on energy consumption & GHGs
Comprehensive policy on a majority of environmental issues
Environmental policy on water
Environmental policy on materials, chemicals & waste
Environmental policy on air pollution

Improvement areas

<div style="border: 1px solid orange; border-radius: 10px; padding: 2px 5px; display: inline-block;">Medium priority</div> Inconclusive documentation for policies on customer health & safety

Environment | Endorsements

Impact on score ●○○○

● → **25**/100

Endorsements are your company's public adherence or commitment to meeting objectives and principles defined by a recognized third-party organization.

Strengths

Endorsement of external initiative on environmental issues

Environment | Measures

Impact on score ●●●●

● → **75**/₁₀₀

Measures are your company's actions to support your sustainability policies and commitments.

Strengths

Adoption of control measures to prevent stormwater pollution
Periodical analysis on the volumes of major air pollutants or ambient air quality monitoring (testing levels of PM, NOx, SO2, VOC or heavy metals)
Design aimed at reducing resource input required for product use
Internal sorting & disposal of waste according to waste streams
Wastewater quality assessment
Implementation of designs or measures to minimise water quality impacts from watercourse crossings
Technologies or practices to recycle or reuse water
Awareness training of employees on local biodiversity and ecosystem issues
Reduction of material consumption through process optimization
Reuse and recycling of construction site materials prior to demolition
Actions to control and limit the spread of invasive species
Provision of accessible waste collection points to facilitate recycling of materials during construction activities
Other actions to reduce energy consumption/GHG emissions
Actions to restore, rehabilitate and maintain ecosystem health and functioning after project completion
Energy and/or carbon audit
Work processes or technologies implemented to mitigate emissions of dust and/or particulate matter
Work processes or technologies implemented to mitigate noise
Actions for labeling, storing, handling and transporting hazardous substances
Training employees to safely handle and manage hazardous substances
Specialized treatment and safe disposal of hazardous substances
Traceability system implemented for hazardous substances
Actions or training to raise employee awareness on waste reduction & sorting
Reduction of internal wastes through material reuse, recovery or repurpose
Actions to prevent soil compaction during operations, construction, installation of equipment
Actions to prevent emissions of atmospheric pollutants and other environmental nuisances (e.g. noise, odor, vibration, road and light)
Work processes or technologies implemented to mitigate emissions of VOC, SO2, NOx or heavy metals
Environmental emergency measures in place
Actions to integrate biodiversity-promoting features and habitats into the design of operational sites
Training of employees on energy conservation/climate actions
Purchase and/or generation of renewable energy
Reduction of carbon emissions in transportation
Adoption of energy efficient construction practices

Improvement areas

Low priority No information on measures regarding customer health & safety

Environment | Certifications Impact on score ●●●○

● → 100/100

Certifications confirm your compliance with international standards (for example, ISO 14001). They must be issued by an external certification body.

Strengths

Environmental management system certification covers between 51% and 75% of the assessed scope

ISO 14001 certified

ISO 50001 certified

Environment | Coverage Multiplying factor

● 100/100

Coverage means the level of deployment of measures and certifications throughout your company. It's a multiplying factor. The higher it is, the higher score will be given to the Measures and Certifications indicators.

Strengths

Supporting documents show an exceptional level of coverage of environmental actions or certification throughout company operations

Environment | Reporting Impact on score ●●●○

● → 25/100

Reporting is based on quantitative KPIs that measure your implementation of sustainability practices.

Strengths

External assurance or verification of sustainability reporting

Reporting on total gross Scope 3 GHG emissions

Total gross Scope 3 GHG emissions reporting value confirmed in supporting documentation

Reporting on total gross Scope 1 GHG emissions

Reporting on total gross Scope 2 GHG emissions (market or location based)

Company communicates progress towards the Sustainable Development Goals (SDGs)

Company reports to CDP

Reporting on total amount of renewable energy consumed

Reporting on total energy consumption

Total gross Scope 2 reporting value confirmed in supporting documentation

Total gross Scope 1 reporting value confirmed in supporting documentation

Reporting in accordance with GRI Universal Standards

Materiality analysis in sustainability reporting

Declares some sites/operations located in or near biodiversity-sensitive areas, but the activities do not negatively affect those areas (not verified)

Improvement areas

High priority

Insufficient reporting on environmental issues

Low priority

Declares reporting on total weight of hazardous waste, but no supporting documentation available

Low priority

No information related to reporting on total weight of waste recovered

Low priority

Declares reporting on total weight of non-hazardous waste, but no supporting documentation available

Low priority

Declares reporting on total water consumption, but no supporting documentation available

Low priority

No information on reporting on total weight of air pollutants

Low priority

No information on reporting on total amount of water recycled and reused

Low priority

No information on reporting on total gross Scope 3 downstream GHG emissions

Works to avoid plastic pollution [NO]

www.banenor.no | 16 Nov 2023

Implenia, which is Bane NOR's general contractor on the Tangenvika railway bridge, has a special focus on avoiding littering and the spread of microplastics to Mjøsa. In collaboration with Hold Norge Rent, Implenia takes various measures to combat plastic pollution in the various projects they have around the country.

Recycles sludge waste and cuts greenhouse gas emissions [NO]

anleggsmaskinen.no | 06 Feb 2023

By lowering the water content of the sludge, the dry matter can be used as filler within the project area. The water that is pressed out can then also be cleaned of contamination more easily. In addition, the pH value in the tunnel water is regulated, so that it is not harmful to be released into nature, explains tunnel project manager Adrian Morsund from Implenia Stangeland.

A pavilion collapses on the Lokstadt construction site [DE]

www.toponline.ch | 02 Nov 2020

There was an accident on a construction site in Winterthur on Monday afternoon. The ceiling of a ten-meter-wide pavilion collapsed, as reported by "landbote.ch". The cause of the collapse is still unclear. Nobody was injured in the collapse. Implenias is the owner of the construction site in question at Lokstadt in Winterthur. This is now checking the course of the accident. It is also unclear who is liable for the collapse. Because no people were injured in the accident, the incident is not being investigated by either the canton police or the city police for the time being.

No conclusive information on endorsement of external initiatives or principles on labor and human rights issues

Labor & Human Rights | Measures

Impact on score ●●●●

● → 100/100

Measures are your company's actions to support your sustainability policies and commitments.

Strengths

Measures to promote gender and/or minority inclusion in the workplace
Employee representatives or employee representative body (e.g. works council)
Impact assessments identifying potential child labor, forced labor and/or human trafficking
Awareness training on discrimination and harassment
Flexible organization of work (eg. remote work, flexi-time)
Communication to all employees of remuneration process (e.g. salary grid, procedure for salary advancement)
Training of employees on health and safety risks and best working practices
Actions to address stress and psychological wellbeing in the workplace
Equipment safety inspections or audits
Actions to control hazardous substance exposure
Regular employee health check-up
Actions to prevent noise exposure
Actions to prevent accidents related to falls
Health care coverage of employees in place
Compensation for extra or atypical working hours
Family Friendly programs (FFPs) implemented (e.g. parental or care leaves, childcare services or allowances)
Grievance mechanism on working conditions
Employee health and safety emergency action plan
Complaints procedure in place for employees to report on occupational health and safety issues
Actions in place to ensure health and safety of non-employee workers and other contracted workers on premises
Actions to promote equal opportunities for all in the workplace
Skills development program tailored to employee needs
Grievance mechanism on child labor, forced labor and/or human trafficking issues
Actions in place to protect young workers
Individual development and career plan for all employees
Actions to ensure equal pay for equal work
Actions to promote the inclusion of employees with disabilities
Grievance mechanism on external stakeholder human rights
Grievance mechanism on discrimination and/or harassment issues
Regular assessment of individual performance
Women development, mentorship, and/or sponsorship programs in place

Labor & Human Rights | Certifications Impact on score ●●●○

● ↗ 100/100

Certifications confirm your compliance with international standards (for example, ISO 14001). They must be issued by an external certification body.

Strengths

SA8000 certification
