

## PRESS RELEASE

### **Implenia secures new infrastructure contracts in Norway worth around CHF 21 million** – Public authorities entrust Implenia with technically demanding bridge building projects designed to optimise local road and rail infrastructure

**Dietlikon, 21 January 2015** – Implenia has secured two new infrastructure contracts in Norway worth a total of CHF 21 million (around NOK 187 million). This includes a combined bridge and road project on the R3 highway in Alvdal that Implenia is carrying out for the Norwegian Public Roads Administration (see map). It involves replacing an existing bridge as well as local roadbuilding measures. The bridge is a technically demanding network wooden arch bridge with a span of around 88 metres. The contract is worth around CHF 10 million (approximately NOK 90 million). The work started in December 2014 and is scheduled for completion by September 2016. The Norwegian Public Rail Administration has awarded the contract for building a continuous girder bridge over the Stjørdal river near Trondheim airport. This will allow for a twin-track section that will greatly help local commuter railway traffic. Implenia is responsible for the substructure and the concrete work for the pillars, as well as for the steel structures. The bridge is approximately 200 metres long and 10 metres wide. The contract is worth around CHF 11 million (approximately NOK 97 million). The work starts this month and will be completed by December 2015. These newly won projects underline Implenia's proven expertise in realising complex infrastructure and bridge building projects.

Implenia will complete the approximately 200 metres long and 10 metres wide steel beam bridge near Trondheim airport by December 2016.

Implenia has secured two new infrastructure contacts in Norway worth a total of around CHF 25 million: construction of a new railway bridge near Trondheim, and a roadbuilding and bridge replacement project near Alvdal.

Implenia is the leading construction and construction services company in Switzerland. Formed in 2006 from the merger between Zschokke and Batigroup, Implenias can look back on around 150 years of history in the construction industry. The company brings the expertise of its highly skilled Modernisation & Development, Buildings and Tunnelling & Civil Engineering Sectors, and its Switzerland and Norway Regions under the single roof of a nationally and internationally active company. With its integrated business model and specialists operating in all its divisions, Implenias can manage a building project through its entire lifecycle and deliver work that is economical, integrated and customer-centric. The focus is on striking a sustainable balance between financial success and social and environmental responsibility.

Implenia, with its headquarters in Dietlikon near Zurich, currently employs more than 6600 people and posted turnover of around CHF 3.1 billion in 2013. The company is listed on the SIX Swiss Exchange (IMPN, CH0023868554). For more information, please visit [www.implenia.com](http://www.implenia.com).
