

PRESS RELEASE

Implenia wins new infrastructure job in Sweden – Contract for a further section of E4 the Stockholm bypass project | Joint Venture with Veidekke worth around SEK 740 Mio. (around CHF 80 Mio.)

Dietlikon, 15 February 2017 – Implenia has secured the contract for another section of Stockholm's Förbifart bypass. The Swedish Transport Administration (Trafikverket) has commissioned Implenia and the Norwegian company Veidekke to execute the complex Hjulsta Södra infrastructure project.

The two companies are building the motorway junction as equal partners. The project is located close to the Johannelund tunnel (Lot FSE 403) and the Lunda tunnel (Lot FSE 410), which also form part of the by-pass and which are being built by Implenia alone. The consortium will be building approximately one kilometre of motorway, including two 650 metre road bridges. The location of the bridges presents the on-site team with some special challenges. Both bridges cross the busy E18 road, as well as the Mälarbanan railway tracks, which are being expanded during the construction period, and the Bällstaån river. It is a complex infrastructure project that also includes access ramps, another 70 metre-long bridge, a 200 metre tunnel, blower stations, storm water attenuation tanks and roadworks. The job, worth around SEK 740 million (around CHF 80 Mio.), starts in February 2017 and should take around five years to complete.

"We are proud to have won the bid for this lot together with our partner Veidekke. Both Veidekke and Implenia have extensive experience in the realisation of complex infrastructure buildings - an optimal starting point for an exciting and successful cooperation," said Fredrik Björckebaum, Managing Director of Implenia Sweden, as the contract was signed.

The Hjulsta Södra job confirms Implenia's market position as an expert in complex infrastructure projects in Sweden.

Implenia is Switzerland's leading construction and construction services company. It also has strong positions in the German, Austrian and Scandinavian infrastructure markets. Established in 2006, Implenia can look back on around 150 years of construction tradition. It brings the expertise of its highly skilled sectoral and regional units together under the roof of a company active throughout Europe. With its integrated business model and specialists operating in all areas of construction, the Group can manage a building project through its entire lifecycle and deliver work that is economical, integrated and customer-centric. The focus is on striking a sustainable balance between financial success and social and environmental responsibility.

Implenia, with its headquarters in Dietlikon near Zurich, currently employs more than 8,000 people around Europe and posted revenue of around CHF 3.3 billion in 2015. The company is listed on the SIX Swiss Exchange (IMPN, CH0023868554). More information can be found at www.implenia.com.
